🐙 github.com/Maxy747

Professional Summary

Artificial Intelligence and Machine Learning Engineer with hands-on experience in cloud infrastructure, DevOps pipelines, and system security. Proficient in AWS, GCP, Docker, Kubernetes, and CI/CD automation. Oracle Cloud Infrastructure 2025 DevOps Professional certified. Experienced in building AI-powered applications, Linux hardening, vulnerability assessment, and Infrastructure as Code. Passionate about building secure, scalable, and automated cloud systems aligned with DevSecOps practices.

Education

Bachelor of Engineering in Artificial Intelligence & Machine Learning Oct 2022 – Mar 2026
Yenepoya Institute of Technology, VTU CGPA: 7.0

Experience

DevOps Intern Sept 2025 – Nov 2025
Elevate Labs

- Built CI/CD pipelines with GitHub Actions and implemented Infrastructure as Code using Terraform
- Containerized applications using Docker and deployed microservices with Kubernetes on Minikube
- Hosted static website on AWS S3 with automated deployment; configured monitoring

Cybersecurity Intern Sept 2025 – Nov 2025
Elevate Labs

- Conducted vulnerability scans, firewall configurations, and system hardening using OpenVAS, Nmap, and UFW
- Created Linux Hardening Audit Tool in Python automating 10+ security checks and compliance reporting

Technical Skills

Cloud & DevOps: AWS, Google Cloud Platform, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform, Infrastructure Automation

Languages: Python, C/C++, C#, JavaScript, SQL, Julia, Bash

AI/ML: TensorFlow, Keras, PyTorch, scikit-learn, Hugging Face, NLTK, Gensim, OpenCV

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau

Web & API: Django REST, Flask, Streamlit, RESTful APIs

Monitoring & Security: Nmap, Wireshark, OpenVAS, Firewalls, Linux System Hardening

Tools: Git, GitHub, Jenkins, DockerHub, Minikube, Unity

Operating Systems: Linux (Ubuntu, Kali), Windows, MacOS

Domains: Generative AI, NLP, Computer Vision, Cybersecurity, VR Development

Certifications

- **Oracle Cloud Infrastructure 2025 Certified DevOps Professional** – Oracle
- **Google Cybersecurity Specialization** – Coursera
- **Introduction to Cybersecurity** – Cisco Networking Academy

Projects

VR Interview Simulator (*Unity, Python, Django REST, Google APIs*)

- Mobile VR application integrating AI-based interviewer with speech recognition and cloud-based backend architecture

Linux Hardening Audit Tool (*Python*)

- Automated security auditing tool for system configurations, SSH policies, and firewall compliance with pass/fail reporting

Max – Student's Personal Assistant (*Python, Streamlit, Gemini API*)

- AI-based assistant for email drafting, scheduling, and note automation showcasing back-end automation and API integration

Achievements & Activities

- Built a CI/CD pipeline with Docker & Kubernetes, cutting deployment time
- Developed a Python tool for Linux hardening and vulnerability assessments
- Delivered a mobile VR Interview Simulator prototype in 6 weeks using Unity, AI-interviewer logic, speech analysis & cloud backend
- Participated in several national-level hackathons focusing on cloud-based and AI-driven automation projects
