Professional Summary

Artificial Intelligence and Machine Learning Engineer with hands-on experience in Python, SQL, Django, and data analysis, with additional experience in cloud technologies, DevOps workflows, and AI-assisted development. Experienced in backend development, API integration, automation scripting, and building data-driven applications. Passionate about analytical problem-solving and creating secure, scalable, and functional systems.

Education

Bachelor of Engineering in Artificial Intelligence & Machine Learning

Oct 2022 – Mar 2026

Yenepoya Institute of Technology, VTU

CGPA: 7.1

Experience

DevOps & Cybersecurity Intern

Sept 2025 – Nov 2025

Elevate Labs

- Built CI/CD pipelines with GitHub Actions and implemented Infrastructure as Code using Terraform
- Containerized applications using Docker and deployed microservices with Kubernetes on Minikube
- Hosted static website on AWS S3 with automated deployment; configured monitoring
- Conducted vulnerability scans, firewall configurations, and system hardening using OpenVAS, Nmap
- Created Linux Hardening Audit Tool in Python automating 10+ security checks and compliance reporting

Technical Skills

Cloud & DevOps: AWS, Google Cloud Platform, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform

Languages: Python, C/C++, C#, JavaScript, SQL, Julia, Bash

AI/ML: TensorFlow, Keras, PyTorch, scikit-learn, Hugging Face, NLTK, Gensim, OpenCV

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, SQL

Web & API: Django REST, Flask, Streamlit, RESTful APIs, API Integration

Monitoring & Security: Nmap, Wireshark, OpenVAS, Firewalls, Linux System Hardening

Tools: Git, GitHub, Postman, Linux, Excel, Jenkins, DockerHub, Minikube, Unity

Operating Systems: Linux (Ubuntu, Kali), Windows, MacOS

Domains: Generative AI, NLP, Computer Vision, Cybersecurity, VR Development

Certifications

- **Oracle Cloud Infrastructure 2025 Certified DevOps Professional** – Oracle
- **Google Cybersecurity Specialization** – Coursera
- **Introduction to Cybersecurity** – Cisco Networking Academy

Projects

VR Interview Simulator (*major project*)

- Built a mobile VR interview system with an AI-driven interviewer, integrating Django REST backend, Unity front-end, and Google STT/TTS and ElevenLabs voice synthesis. Implemented interview flow, response handling, and real-time Unity–Django communication for seamless voice-based interaction.

Linux Hardening Audit Tool (*project*)

- Automated security auditing tool for system configurations, SSH policies, and firewall compliance with pass/fail reporting

Max – Student's Personal Assistant (*mini project*)

- AI-based assistant for email drafting, scheduling, and note automation showcasing back-end automation and API integration

Achievements & Activities

- Built a CI/CD pipeline with Docker & Kubernetes, cutting deployment time
- Delivered a mobile VR Interview Simulator prototype in 6 weeks using Unity, AI-interviewer logic, speech analysis & cloud backend
- Participated in several national-level hackathons focusing on cloud-based and AI-driven automation projects
