

ASHWIN RAJ K C

AI Engineer

ashwinrajkc@gmail.com

+91 8848532354

Kozhikode, Kerala

[LinkedIn](#)

Summary

Analytical and detail-oriented AI Engineer skilled in Python, Machine Learning, Deep Learning, and AI-based application development. Experienced in building intelligent systems, and applying AI techniques to solve real-world problems. Proficient in data preprocessing, feature engineering, model optimization, and API integration. Seeking to leverage strong problem-solving and technical skills to develop scalable and impactful AI solutions.

Experience

Artificial Intelligence Intern

InternsForge, Bengaluru

August 2025 – Present

- Collaborated with industry professionals to gain practical experience in AI, Machine Learning, and Data Science by focusing on real-world data-driven applications and predictive modeling.
- Strengthened technical, analytical, and data handling skills through hands-on projects, expert mentorship, and use of industry-standard tools and best practices.

Machine Learning Engineer and Team Leader (Academic Role)

October 2024 – December 2024

- Led development of an AI-powered agriculture platform delivering data-driven solutions like crop prediction, price forecasting, and analytics by collecting, cleaning, and analyzing large datasets from multiple sources.
- Designed, deployed, and integrated predictive machine learning models using Python into a functional web application while managing team collaboration, task allocation, and ensuring on-time project delivery.

Projects

AI-Powered Farmers' Assistance Platform

Built a platform with chatbot support, market Price Prediction, crop recommendation (based on soil nutrients), Fertilizer Recommendation, plant disease detection, and a farmer community forum.

Student Personalized Chatbot (GenAI)

Developed an academic support chatbot using Python, Streamlit, and Gemini API for task scheduling and study management.

Exploratory Data Analysis and Statistical Profiling

Conducted statistical analyses like correlation mapping and anomaly detection with informative visualizations. Enabled feature selection and improved model performance through detailed understanding.

Unsupervised Learning and Dimensionality Reduction for Data Insights

Leveraged K-means clustering and Principal Component Analysis (PCA) to uncover hidden structures, reduce dimensionality, and visualize patterns. Improved interpretability and gained insights from healthcare datasets.

Language Modeling, Parsing, and Translation using NLP Tools

Developed a simple English-to-Spanish translation model using Hugging Face Transformers. Applied CFG-based parsing, n-gram modeling, and POS tagging with NLTK to analyze sentence structure and linguistic patterns.

Natural Language Processing and Text Classification

Built end-to-end NLP pipelines using scikit-learn and custom Python logic. Implemented Naive Bayes classification for genre prediction with NLTK-based text preprocessing.

Generative AI Projects with Transformers & Word Embeddings

Trained a Word2Vec model on a medical corpus using Gensim and NLTK, applied PCA, and visualized semantic relationships in 2D space. Built synonym-enhanced prompts with GPT-2 and WordNet; performed sentiment analysis and text summarization using Hugging Face pipelines.

Skills

Programming Python, C, Julia, Dart, JavaScript, C++, SQL, R	ML Libraries & Tools scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib, Seaborn	Databases & Data Management MySQL, MongoDB, PostgreSQL, SQLite
Version Control Git, GitHub	API Development RESTful APIs, Django REST Framework	Tools & Platforms Jupyter Notebook, Google Colab, VS Code, Postman, pgAdmin, MySQL Workbench, Power BI, Tableau

Certifications

- TCS iON National Proficiency Test (NPT) – Pro Certification in Artificial Intelligence**
Issued by TCS iON & IIT Kharagpur | Hands-on AI for Real-World Challenges (AI4ICPS)
- Python for Data Science**
Issued by IBM & Cognitive Classes | Focused on Pandas, NumPy, and data visualization
- Advanced Machine Learning Hands-On Course – TCS iON & IIT Kharagpur**
Issued by IIT Kharagpur & TCS iON | Practical applications of AI in real-world scenarios
- Google Cybersecurity Certification**
Issued by Google | Covered core principles, risk management, threat detection & mitigation
- Rapid Development for AI Services**
Issued by IBM Developer Skills Network | Building scalable AI-driven solutions
- Web & Frontend Development & UI Design**
HTML – IIT Bombay, Frontend Dev – Study Comrade, Web Dev – Cognitive Classes, React – LetsUpgrade

Education

Bachelor of Engineering (B.E.)

Course: Artificial Intelligence and Machine Learning2022 – Present

College: Yenepoya Institute of Technology | University: VTU | CGPA: 8.03

Higher Secondary Education

Stream: Science | Board: Board of Higher Secondary Examination Kerala2020 – 2022

Grade: 91%

Secondary School

Board: Board of Public Examination Kerala2018 – 2020

Grade: 90%
